The Art of True Sound

PSI AUDIO - THE ART OF TRUE SOUND

For decades, PSI Audio has been at the forefront of sound reproduction, trusted by the most demanding professionals in the world. Now, we bring this same level of precision and passion to the audiophile world - where every note, every breath, and every nuance matter.

Our approach is not about coloring the sound or adding artificial warmth. It's about revealing the music exactly as it was meant to be heard, with all its depth, detail, and emotion intact. Because true fidelity isn't about adding - it's about unveiling.

Héritage3 - A Legacy of Perfection

Born from our deep expertise in studio monitoring, the **Héritage3** is an invitation to rediscover your favorite recordings with a level of clarity and depth unmatched in home audio. Every component, every curve, every detail is designed to vanish, leaving only the purest, most authentic sound experience. It is more than a speaker - it is an instrument of truth.

AVAA C214

Silence as you've never heard it

Bass control has always been a challenge for audiophiles. Traditional acoustic treatment takes up space, and digital corrections alter the sound. The **AVAA C214** is different: an active bass trap that naturally absorbs standing waves, revealing a room that simply disappears, letting the music exist in its purest form. Once you experience its effect, you will never go back.

SWISS MADE

A215-M White

The Grand Elegance of Sound

Powerful yet refined, the **A215-M White** is the perfect blend of precision and musicality. Designed for both professional and audiophile environments, it delivers an immersive, full-range listening experience with a breathtakingly natural balance. Whether you seek the delicate touch of a piano note or the deep resonance of a cello, the A215-M White brings music to life with astonishing realism.

Listen to the way music was made

Since 1977, PSI Audio has been dedicated to the pursuit of absolute precision in sound. With over 30 years of expertise in active speaker design, we have developed our own cutting-edge technologies to deliver unparalleled accuracy. Our heritage includes crafting studio monitors for Studer, a testament to our commitment to excellence. Every PSI Audio speaker is designed and built in Switzerland, ensuring the purest reproduction of sound—so you can listen to music exactly as it was made.
